When the uninstaller is launched, it asks you to set up only one option (it forces the deletion of the main folder).

S IzPack - Uninstaller	
O This will remove the installed application!	
Force the deletion of C:\Program Files (x86)\Lec	tra\Manager
	Quit

Two buttons allow you to start the **uninstall** or to **quit**.

Uninstalling iReport

During the uninstall, the uninstaller will ask you if you want to uninstall **iReport** too.

Launching the iReport uninstaller will completely remove iReport.

Be careful, this will completely uninstall **iReport**, not just the **Report Plugin** installed.

Once the uninstall is completed, you just have to click the Quit button.

SizPack - Uninstaller				
This will remove the installed application!				
\checkmark Force the deletion of C:\Pro	gram Files (x86)\Lectra\Manager			
	[Finished]			
Uninstall	🙁 Quit			

WARNING: Even after you have uninstalled the application, the main installation folder remains in place. This is because the uninstaller uses the JRE subfolder which cannot be removed.

The existing main folder causes no problem. However if you want to delete it, you can do so once the uninstall is completed.
